Fluid have now transferred our phones over to VoIP at all our 5 locations no down time has been experienced and we now have a system that allows us flexibility to manage working remotely through these complex times and maintaining communication with our employees and clients.

I would highly recommend working with Fluid - Diane Brown, Thomas Consulting

We were having major problems with telephones and broadband from a big provider with no interest in trying to solve the issues. Someone suggested trying Fluid Network Solutions, so I did and they sorted everything out for us quickly and efficiently and we have been with them ever since.

Now we wouldn't use anyone else - Matthew Meddings, Absolute Personnel
